

HEOS Super Link

WHOLE HOME AUDIO IN A SINGLE CHASSIS.

NETWORKED MULTI-ROOM PRE-AMPLIFIER

The evolution continues with the HEOS Super Link, a four zone, multi-room preamplifier designed for the custom install market. Combines four HEOS zones in a single, compact, rack-mountable chassis.

The HEOS Super Link forms the bridge between the HEOS wireless multiroom sound system and complete custom-installed audio set-ups. HEOS enables you to enjoy your favourite music anywhere and everywhere around the house, using an existing home network; HEOS Super Link takes the concept of the HEOS Link, designed to connect existing audio systems to a HEOS network, and expands it for professionally-fitted distributed sound installations.

HEOS Super Link is effectively four HEOS zones in a single 1U (1.75" tall) chassis, with rack mount ears, reliable wired Ethernet input and pass-through and compact size. That makes the HEOS Super Link the perfect choice for a whole-home distributed audio system – like all HEOS products, it can be controlled using the HEOS app for iOS, Android and Kindle Fire. The App allows you to explore, browse and play music from your own music library. You can also stream music from online music services and thousands of internet radio stations.

PERFECT SOUND, VERSATILE INSTALLATION.

Specifically designed with the custom installer in mind—and building off the success of the HEOS Link—the Denon HEOS Super Link provides coverage to all four HEOS zones in a single 1U (1.75" tall) chassis. With robust, third party control from popular manufacturers including Control4, Crestron, RTI, URC and ELAN, the HEOS Super Link is customizable within almost any professional-quality home audio environment.

KEY FEATURES

- Four independent HEOS zones
- Amazon Alexa voice integration
- Dedicated analog, fiber optic and coaxial outputs for each zone
- Third Party Control Compatible
- Four x 12V Trigger Outputs
